SUMMARY

Front-end and embedded developer with hands-on experience building web interfaces for IoT products and industrial monitoring systems. Passionate about bridging the gap between software and hardware - from React applications to microcontroller firmware.

EXPERIENCE

Junior Application Developer and Web Designer

2025 - 2026

Katz Water Technologies

- Built and maintained web interfaces for the KMonit IoT water monitoring system, including real-time data dashboards and device monitoring features.
- Developed the RadiPulse Power marketing and product website from the ground up.
- Worked with React, TypeScript, Vite, and Tailwind CSS across all projects.
- Collaborated on development of firmware for hardware IoT products.
- Participated in deployment and maintenance of production websites, including hosting setup and updates.

Freelance Developer

2023 - 2024

Commissioned Projects

- Delivered a full e-commerce storefront (Pangasinan Treasure) using vanilla JavaScript, HTML, and CSS for the frontend, Express.js for the backend, and MongoDB for the database.
- Built an egg quality inspection system (EggQI) using ESP32 camera and Android App built with MIT app inventor.

NOTABLE PROJECTS

KMonit

Project · 2026

Industrial IoT water tank monitoring platform. microcontroller-based hardware and web + mobile dashboards for multi-site management.

RadiPulse Power

Project · 2025

Marketing and product website for a modular LiFePO4 virtual power pack with real-time IoT monitoring. Built with React, TypeScript, Vite, and Tailwind CSS.

SmartPlug

Thesis · 2024

React Native Android app paired with an ESP-01 smart plug for remote power control and automated scheduling.

EDUCATION

Bachelor of Science in Computer Science

2019 - 2023

Pangasinan State University, Philippines

SKILLS

Languages	TypeScript, JavaScript, Java, HTML, CSS, C, C++
Frontend	React, React Native, Next.js, Tailwind CSS, Vite
Backend	Node.js, Express.js, MongoDB
Hardware	ESP32, ESP8266, Arduino, Raspberry Pi
Tools	Git, Figma
